“Genomics & Personalized Medicine: The Next Frontier in Preventing & Treating Bipolar Disorder”

Project Announcement & Panel Discussion

Genetics plays a big role in diagnosing and treating bipolar disorder (BD). Please join us for an announcement about an exciting new research project that could improve early detection and treatment of BD – followed by a panel discussion with Nova Scotia Health Authority/Dalhousie University mental health researchers Dr. Martin Alda and Dr. Rudolf Uher (moderated by Cynthia Maillet, former radio producer/host for Radio Canada & CBC) on new genetic approaches to diagnosing and treating BD.

Date & Time: Thursday, February 7th, 2019- 6:00pm

Location: Life Sciences Research Institute (LSRI) Atrium
1344 Summer Street, Halifax, Nova Scotia

Hosted by Genome Atlantic with support from Genome Canada and in partnership with the Research Nova Scotia Trust, Nova Scotia Health Authority, the Dalhousie University Department of Psychiatry and the Dalhousie Medical Research Foundation.

All welcome, please register at: <http://genomeatlantic.eventbrite.ca>
